---

I think this is all of the data that is missing. There were a few other files with preliminary data, but they were superseded by subsequent final data so I did not forward those to try to keep the confusion down. I love it when we get data piece-meal!  
I think the next step is to setup a meeting with Angela or at least get her response to the message from earlier today. We tried to set something up with her last week but it did not work out.

Chuck

=====  
All,

Please see the attached figure for the EQP property.

Indoor air samples IA1-IA5 and sub-slab samples SS1-SS7 were collected in the School. Indoor air samples IA6-IA8 and sub-slab samples SS8-SS9 were collected in the Print Shop. Indoor air sample IA9 and sub-slab sample SS-10 were collected in the Modeling School.

Please call me if you have any questions - 609.247.2187.

Thanks,

Mike

There were 3 cans that had high acetone and need to be re-run.

SERAS will re-run them today and re-issue the prelims tomorrow.

So these are pre-prelims use with caution.

Mike is going to send a Map tonight so we can locate the cans

Thank you,

Jeff M. Catanzarita
